Education

Hunter College | *B.A. Computer Science*   Expected June 2021

- GPA: 3.41/4.0 | Daedalus Honors Program
- Activities: Hunter ACM Club, Women in CS Club
- Relevant Coursework: Data Structures and Algorithms, Discrete Structures, Applied Statistics

Experience

WHIM | *Software Engineering Intern*   June 2019 - September 2019

- Assisted in quality assurance and front end development at a startup with 3 engineers to help push our software to set up advertisement displays for our consumer product.
- Tested web and mobile apps for bugs, improvements, and new features.
- Developed UI features on the web application with React, Redux, and SCSS.
- Optimized and programmed UI tests in TypeScript to reduce automation test runtime by 90%.

Projects and Hackathons

Your Friend Online | TechTogether NY - Best Education Hack and Best Domain Hack | *yourfriend.online*

- In a team of 4, created and implemented 2 chatbots and 1 survey bot to help guide students through their prospective college careers. The bots provide academic and emotional support to help them navigate and cope through their college journey.
- Utilized HTML, CSS, and JavaScript for the webpage and chatbots, and Google App Engine for deployment.

PottyNYC | BigRedHacks | *pottynyc.live*

- Created a web application in a team of 2 that finds the nearest public restroom in NYC using HTML, CSS, JavaScript, and the Google Maps API.
- Parsed and cleaned the public restroom location data with JavaScript and Apify.
- Implemented the web page layout with Materialize and used Google App Engine for deployment.

CunyFirst2.0 | *cunysecond.pillows.dev*

- Worked with a team of 4 in a web development bootcamp to develop a web application built to replicate features of our college's web portal, such as the login screen, search tool, add/remove class function, and the schedule view.
- Designed the UI/UX of the web pages using React, CSS, and Material-UI.

Community Contributions

- Administrator of Subtle Asian Tech: Moderates a Facebook group of over 8,000 members. We provide resume review, interview prep, and professional networking opportunities to those in tech.
- Former Head Programmer and CAD Designer of the Midwood High School Robotics Team.

Skills

- **Languages**: C++, HTML/CSS, JavaScript, Java, Python, SQL
- **Tools and Frameworks**: Git, React, Jira, Node, Redux, Materialize, SCSS, Docker, Postman, Unix
